artistDOB	Artist's date of birth.	Date		YYYY-MM-DD	
artistDebutYear	The year the artist debut.	Date		YYYY-MM-DD	
Column: Album	Description	Data type		Format	Key
albumID	Unique ID specific to each artist.	Integer		1xx	primary key
albumTitle	The name of the album as published publicly.	Text	45		
albumReleaseDate	The date on which the album was released.	Date		YYYY-MM-DD	
albumGenre	The genre of the album.	Text	45		
artistID	Unique ID specific to each artist used to link an album to an artist.	Text	10	Axxx	foreign key (ref Artist)
Column: StreamingData	Description	Data type		Format	Key
streamID	Unique ID generated every time a song is streamed.	Integer		3xx	primary key
streamPlatform	Platform (ie. Spotify, Apple Music) a song is streamed on.	Text	45		
streamRevenue	Total revenue generated from one specific stream.	Integer		xxxxx	
songID	The song associated with each stream.	Integer		2xx	foreign key (ref Song)
Column: Song	Description	Data type		Format	Key
songID	Unique ID specific to each album.	Integer		2xx	primary key
songTitle	The name of the song.	Text	45		
songReleaseDate	The date on which the song is released.	Date		YYYY-MM-DD	
songLabel	The record label that produces the song.	Text	45		
songGenre	The genre of the song.	Text	45		
albumID	Unique ID specific to each album.	Integer		1xx	foreign key (ref Album)
Column: Awards	Description	Data type		Format	Key
awardID	Unique ID specific to each artist.	Integer		9xx	primary key
awardName	The award name.	Text	45		
awardCategory	Category the award belongs to.	Text	45		
awardYear	The year the award is given	Date		YYYY-MM-DD	
artistID	Unique ID specific to each artist.	Text	10	Axx	foreign key (ref Artist)
Column: Collaborations	Description	Data type		Format	Key
collabID	Unique ID specific to each collab.	Integer		2xx	primary key
collabRole	Artist's role in collaboration (feature or producer).	Text	45		
songID	Unique ID specific to each song.	Integer		4xx	foreign key (ref Song)
artistID	Unique ID specific to each artist.	Text	10	Axxx	foreign key (ref Artist)
Column: Concert	Description	Data type		Format	Key
concertID	Unique ID specific to each concert.	Integer		5xx	primary key
tourName	Tours have names to identify itself.	Text	45		
concertDate	The date on which the concert is held	Date		YYYY-MM-DD	
venueID	Unique ID specific to each venue.	Integer		6xx	foreign key (ref Venue)
artistID	Unique ID specific to each artist.	Text	45	Axxx	foreign key (ref Artist)
Column: Ticket	Description	Data type		Format	Key
ticketID	Unique ID specific to each ticket.	Integer		7xx	primary key
seatNo	Seat number the ticket refers to.	Integer		xx	
ticketPrice	The cost of each ticket.	Integer		1xx	
concertID	Unique ID specific to each concertID	Integer		5xx	foreign key (ref Concert)

Column: Venue	Description	Data type		Format	Key
venueID	Unique ID specific to each venue.	Integer		6xx	primary key
venueName	The name of the venue.	Text	45		
venueCity	The city which the venue is in.	Text	45		
venueCapacity	The number of people the venue can hold.	Integer		xxxxx	
Column: Royalty	Description	Data type		Format	Key
royaltyID	Unique ID specific to each royalty.	Integer		8xx	primary key
royaltyPercentageShare	The percentage in which the artist gets from a royalty.	Decimal		xx.xx	
royaltyAmount	The amount paid from the royalty.	Integer		xxxx	
artistID	Unique ID specific to each artist.	Text	10	Axxx	foreign key (ref Artist)
Column: RecordLabel	Description	Data type		Format	Key
labelID	Unique ID specific to each label.	Integer		1xxx	primary key
labelName	The name of the label.	Text	45		
labelFoundingYear	The year the record label was founded.	Date		YYYY-MM-DD	
labelCountry	The country the label is based in.	Text	45		
labelCEO	The CEO of the record label.	Text	45		
Column: Contract	Description	Data type		Format	Key
artistID	Unique ID specific to each artist.	Text	10	Axxx	foreign key (ref Artist)
labelID	Unique ID specific to each label.	Integer		1xxx	foreign key (ref RecordLabel)
